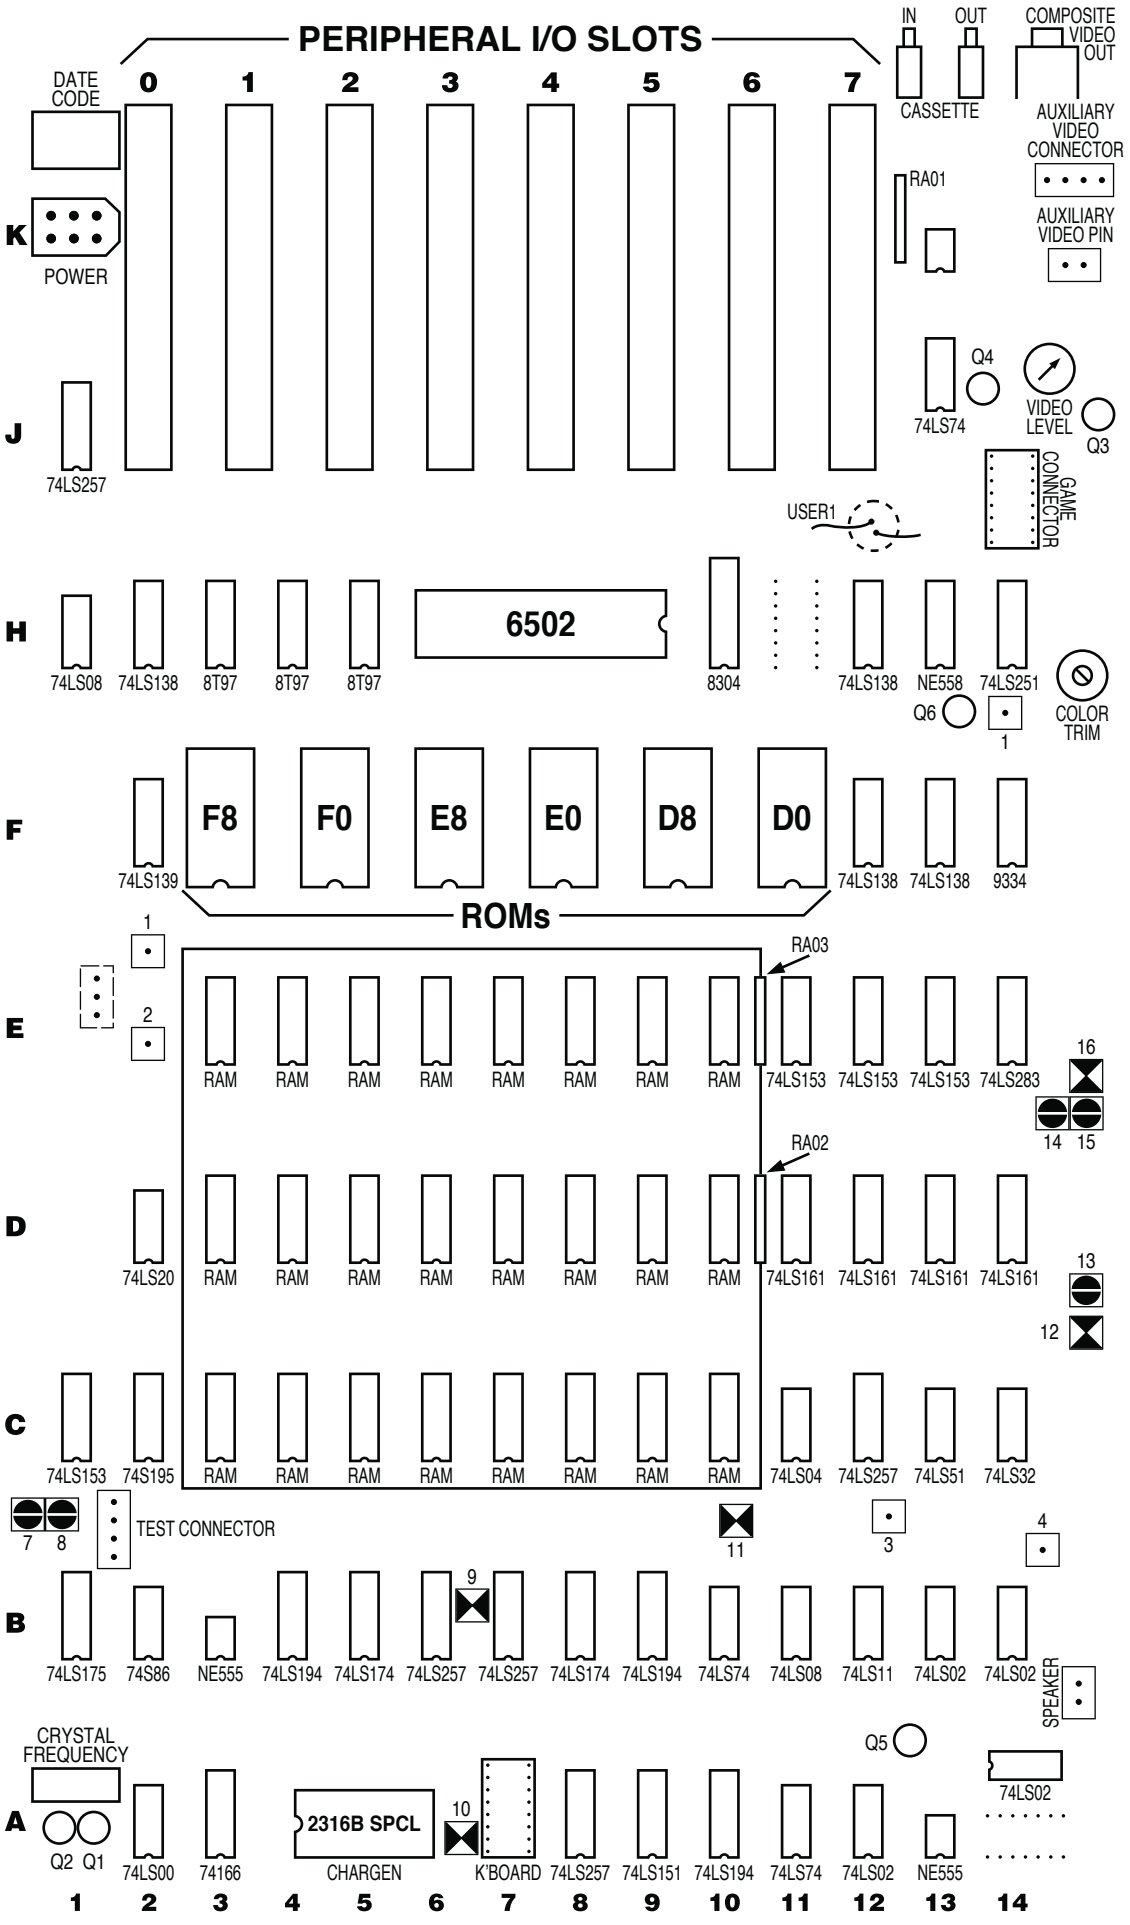
wozfest labs apple II/II+ test sheet mobo revision: rfi



Rev. product codes:
820-0044-01
820-0044-C
820-0044-D

Case Serial Number:

PSU Serial Number:

Keyboard Type:

Notes:

Test Sessions:

#	Date	Up to
eg	06/05/21	A2
1.	/ /	
2.	/ /	
3.	/ /	
4.	/ /	
5.	/ /	
6.	/ /	
7.	/ /	
8.	/ /	

Suggested usage: Highlight mobo product code above. Work from A1 to J13, using a green highlighter for good components, and a red pen for bad. Remark bad components with green highlighter when replaced/repaired. Record board and system details as needed. Pad statuses can be shown. 16K of good RAM in Row C is needed to boot.

After Gayler *The Apple II Circuit Description* and Sather *Understanding the Apple II*.
